

SOMAR SKRÅLA ERRATA & CLARIFICATIONS

RULES

Reinforcement Requests: allow Galley Sail in the Decommissioned Pools to be purchased at a cost of 1/2 point each.

Danish Involvement:

- 1) Rules correction: there is no Danish Intrigue DRM on the Riksdag Table.
- 2) Clarification: if the Danes have not become Involved by the official 'game end', they will not be used at all.

CHARTS & TABLES

Weather Gauge Chart: 2nd Galley modifier (omitted): apply a -2 modifier for any Galley Formation in any non-Straits or non-Port Space (i.e. reversing the +2 bonus for 'confined' Spaces).

COUNTERS

A LESSER WRATH ERRATA & CLARIFICATIONS

RULES

Clarifications:

- 1) HQs have an inherent strength of ONE (1) SP.
- 2) Throughout the text, read 'Muscovite' for 'Russian'.
- 3) 1741 Scenario Swedish Leaders Wrangel & Buddenbrog should be set up with the Units belonging to their respective 'columns'.

CHARTS & TABLES

Turn Record Track – Weather: Cold Weather AC row shift is +1 not +2

TEC: Fortified City hex added to TEC.

Swedish Reinforcement Table: table altered to the following odds:

<i>DR</i>	<i>Result</i>
0	4 SPs
1-2	2 SPs
3-4	1 SP
5+	NA

COUNTERS

Missing Riksdag Marker (Hats/Caps Ascendant): images added on page 3; counter added to the *A Lesser Wrath* counter mix for all new copies, plus inserted into the *Yellow Jack* counter mix.

Muscovite Positional Artillery: there is no such Unit. Where Positional Artillery is called for in the scenarios use the 2nd Field Artillery Unit.

COMBINED GAME ERRATA & CLARIFICATIONS

RULES

Muscovite Draft: eliminate SIX (6) Muscovite Line Infantry Units when taking a Draft to aid in Naval Repair; these Units may reenter play as Replacements.

Scenario Start: use the starting rules from the 1741 scenario independently for each game. *Somar Skråla* will most likely start up first, since it depends on Ice conditions. Ignore the *ALW* map entirely until it is time to check for the start of the land game (around the August Turn).
