

# SISU Errata & Q&A

## Scenario Set Up

Q. I went through the setups for both scenarios and I have some questions:

- 1 - 1942 Finns, Formation S - rules say 22 counters including leader; there are 27 in the countermix. Typo?
- 2 - 1942 Finns, Formation M - rules say 16 counters including leader; there are 18 in the countermix. Typo?
- 3 - 1944 Finns - There is no hex placement reference for unit F of the ITTK.3 (12 RTR, or colorless, units) where does it go? Also, 1.1 and 1.3 Pion 12 (Vuorilohko, or yellow, units) are placed in hex 0910. There is no 1.3 Pion 12, but there is a 2.1 Pion 12; typo?
- 4 - 1944 Germans, Wave 2 - arty class units of II.68; rules say 10 units plus spotter but I count 9; was the ammo marker included in the 10? Or am I missing a counter? Also, does the KM Ammo counter get placed in the SE OMB or the NE OMB or does it matter which box as long as it is on the map per Rule 6.212.6?

A. Those look to be typos. Some may be due to mass changing of case numbers during editing. That's sure to be the case for the Pion units. If the counter sheets came complete you will have everything. Re II.68 looks like 10 units including Spotter and Ammo. The initial location of the KM Ammo shouldn't matter. For the Finnish AAA, free set up.
